Summary

Frontend Developer , with 2+ years of experience in IT. Experienced in designing, developing and testing UI of web applications.

The skills I have acquired are excellent knowledge of the core Javascript language and the principles on which it's work is based, also Typescript, Angular framework, Bootstrap framework. The knowledge of HTML and CSS (SCSS preprocesor) is at high level.

My knowledge related to Javascript and Angular was increased by attending several high quality online courses, along with developing my practical project in the form of a web application.

The other skills that I acquired are:

- GIT version control system.
- Firebase
- Socket
- Node.js basics

English proficiency intermediate, B2 level.

I can say that I am dedicated, diligent, ambitious, communicative, ready to give my best for the team in order to achieve goals, that I am open to acquiring new skills.
