Hobbies

- Reading
- Workout

Summary

Frontend Developer , with 2+ years of experience in IT. Experienced in designing, developing and testing UI of dynamic web applications.

The skills I have acquired are excellent knowledge of the core Javascript language and the principles on which it's work is based, also Typescript, Angular framework, Bootstrap framework. Of course, the knowledge of HTML and CSS (SCSS preprocesor) is at a very high level.

In the previous year and a half while I wasn't working in any company , I was working on finishing the faculty and obtaining higher education.
For that time my knowledge related to Javascript and Angular knowledge has been enhanced by attending several high-quality online courses, along with developing a practical project in the form of a web application.

Other skills that I acquired are:
- GIT version control system.
- Firebase
- Socket
- Node.js basics

Education

Bachelor of Science: **Computer Engineering**
Faculty of Technical Sciences Čačak, University of Kragujevac
